Configuration fixture - page one

Fixture identifier: native-text-config-page-1

LLM_ENABLED=false disables model analysis.

PROMETHEUS_URL selects the configured metrics server.

This file has an embedded text layer and contains no scanned text.

Interpretation fixture - page two

Fixture identifier: native-text-limits-page-2

Actuator snapshots describe the current observed state.

Successful scrape evaluations do not prove business health.

This is a deterministic parser fixture, not an incident report.
